

Lucy^{Rx}

We're here to help you save.

LucyRx partners with your employer or health plan to ensure you get the medications you need at the best price

This UBC Expanded Custom Preventive Drug List provided by LucyRx allows a member to obtain certain preventive medicines covered at a lower cost—even before you meet your deductible.

This list focuses on drugs that help prevent or manage common conditions (such as blood pressure, blood thinners, cholesterol medicines, prenatal vitamins and asthma inhalers).

Coverage can vary by drug. Some items may require a generic version, prior authorization, step therapy, or a specific quantity limit. Your copay or coinsurance for these preventive drugs will be shown at the pharmacy.

To see if your medication is included, check the Preventive Drug List below. If you have questions regarding your benefits or coverage, please call the LucyRx Prescription Care Team at 877-860-8846.

Use the key below to understand the listing:

- Brand-name drugs are listed in CAPITAL letters. Example: CARDIZEM CD
- Generic drugs are listed in lower-case letters. Example: diltiazem cd

For the member: FDA approved generic medications meet strict standards and contain the same active ingredients as their corresponding brand name medications, although they may have a different appearance.

For the physician: Please prescribe preferred products and allow generic substitutions when medically appropriate to support access to cost effective preventive care.
