

How to add dependents & caregivers

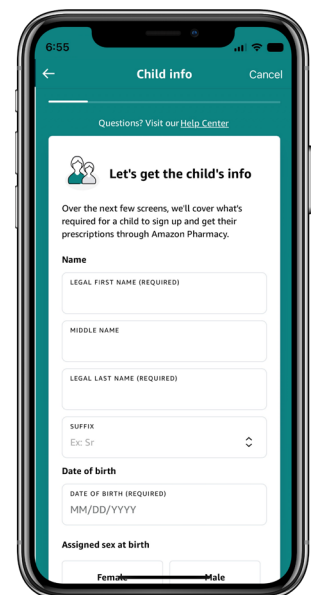

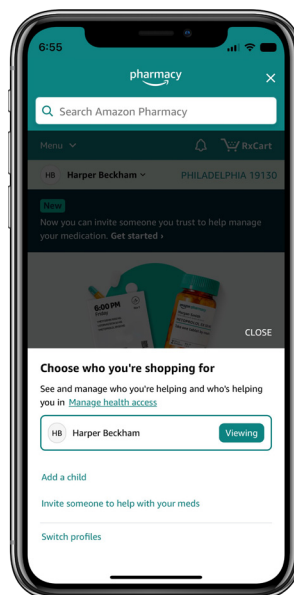

Easily add those in your care:

Add a child (under 18)

From your Amazon Pharmacy dashboard:

- 1 Go to your name or profile
- 2 Select "Add a child" (children must be under 18)
- 3 Enter the details (name, date of birth, and any requested info)
- 4 Save the profile

Now you can easily switch profiles to manage everyone's medications

How you can manage your child's profile

- ✓ Request new prescriptions or transfers
- ✓ View their medication list and refills
- ✓ Update delivery addresses and control payment methods
- ✓ Get notifications when their medications are ready to order or already shipped

Need help? Call customer care at: 855-206-3609

Add a caregiver:

Adults & caregivers (18+)

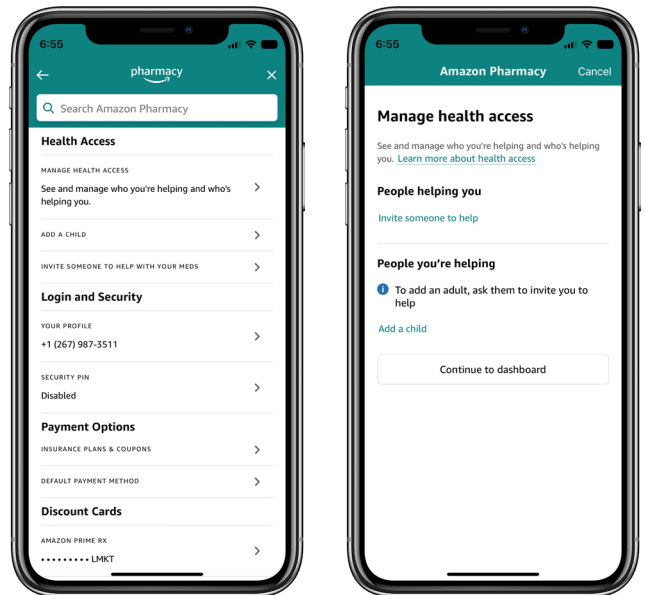

Adults 18 and over with their own Amazon Pharmacy profile can invite you as a caregiver so you can conveniently manage their medications while keeping their information secure.

How adults invite a caregiver

From the adult's Amazon Pharmacy profile:

- 1 Go to account settings
- 2 Look for "Caregivers" or "Manage access"
- 3 Enter the name and email address where invitation should be sent

As the person invited, you would accept the invite from your email or Amazon Pharmacy dashboard

What caregiver access allows

- ✓ See current medications and refills for the person you care for
- ✓ Help request refills or transfers as allowed
- ✓ Track shipments and delivery updates
- ✓ Coordinate delivery addresses and schedules (with permission)
- ✓ Support older adults, partners, or family members safely and conveniently
