We're here to help you save

LucyRx partners with your employer or health plan to ensure you get the medications you need at the best price.

LucyRx Formulary Marketplace — Flex

The following is a list of drugs covered on your plan's base formulary. Final coverage is subject to your specific plan benefits, so inclusion on this list does not guarantee coverage.

How to Use This Document

This formulary list helps you determine which medications are covered by your plan and identify lower-cost options, when available. Use the key to the right to understand the listing.

To maximize savings, look to generic drug options (listed in lowercase). If your medication is not listed, talk to your doctor about switching to a covered alternative.

PLEASE NOTE: Brand-name drugs may move to nonformulary status if a generic version becomes available during the year. Not all the drugs listed are covered by all prescription plans; check your benefit materials for the specific drugs covered and the copayments for your prescription plan. For specific questions about your coverage, please call the phone number printed on your member ID card.

KEY

[SP] – Specialty Drug

Brand-name drugs are listed in CAPITAL letters.
Example: ABILIFY MAINTENA

Generic drugs are listed in lowercase letters.
Example: ibuprofen

Members: generic medications meet strict standards and contain the same active ingredients as their corresponding brand-name medications, although they may have a different appearance.

Physicians: Please prescribe preferred products and allow generic substitutions when medically appropriate.

Costs for covered alternatives may vary.
